

As Yespan Elektrik Sanayi ve Ticaret Ltd. Şti., within the scope of our Environmental Management System, we adopt as our Environmental Policy the commitment to take and maintain the necessary measures to minimize the negative impacts on the environment.

Within this general framework:

- Production activities are carried out in accordance with environmental laws and regulations,
- Within technical and economic possibilities, appropriate technologies that cause the least harm to the environment are used, and the use of materials consumed in production is reduced to help protect natural resources,
- Hazardous and non-hazardous wastes are collected separately, and possibilities for safe disposal, recycling, and reuse are ensured,
- Environmental objectives and targets are established to contribute to continuous improvement,
- Current environmental legislation is followed within the scope of legal compliance assessment processes, and environmental procedures are adhered to,
- Environmental risks are identified, and efforts are made to keep them under control,
- Environmental awareness training is provided to all employees to help them understand the environmental impacts related to their work areas and reduce environmental risks,
- Participation of all employees and suppliers is ensured in all processes.
